Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/567,970	Applicant(s) KOBAYASHI, YUU	
	Examiner John Ricci	Art Unit 3711	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 6, line 10, it is not clear what is the "other end side".

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Brown et al 2,733,885 (of record).

Brown shows a telescopic device including a body with tubular members 10, 11, 12, 13, having a reduced diameter at one end, the larger diameter members having inner surfaces which engage the outer surface of the adjacent smaller member to hold the members in the extended state, and the members retractable so the smaller member is nested within the larger member; and when the members are retracted, the maximum diameter member 10 at one end, and the end cap grip 15 at the other end,

Art Unit: 3711

are locked to each other by means of rod 18 and socket 21 to hold the members retracted. This could be used as a beating appliance to make noise.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16 & 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brown et al in view of Parsons 5,667,441 (of record).

In the device of Brown, a spring is used to hold the members extended; this may be heavy and complex. Parsons shows that adjacent members may include a complementary projection and recess 24 to hold the members. This would be more convenient than the spring. The projections and recesses shown by Parsons would be an obvious modification to hold the members shown by Brown extended.

Claims 2, 3, 5, 7, 8, 15, & 18-20 are allowed.
